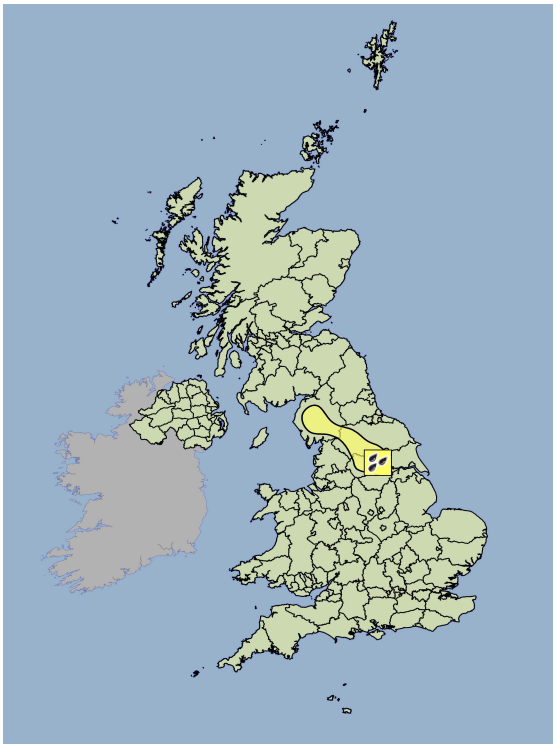
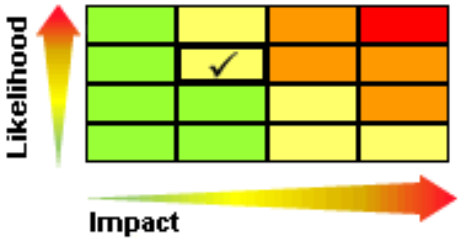
National Severe Weather Warning Service





Chief Forecasters Assessment
A mild, moist west to southwesterly airstream will bring further spells of heavy, persistent rain across parts of northern England during Monday and Tuesday. The heaviest rainfall is likely to be over the higher ground of Cumbria and Pennine Yorkshire, with widely around 30-50 mm and up to 80 mm in the very wettest spots. This may cause some minor disruption due to either river or surface water flooding,

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **03:00 on Mon, 22nd Dec 2014** until **23:55 on Tue, 23rd Dec 2014**

Spells of persistent, and at times heavy, rain will affect parts of northern and northwest England on Monday and Tuesday. This rain will fall onto already saturated ground and the public should be aware of the possibility of some minor flooding, affecting for example some road networks.
